

Aviv Kanarik
STUDENT OF THE MONTH
Los Altos High School
May 2023

Junior

Los Altos High School is proud to honor Aviv Kanarik as our May Student of the Month. It is a privilege to recognize all of her accomplishments throughout her time at Los Altos High School.

At LAHS, Aviv is the President & founder of the Astro Club, and teaches students of all levels about astrophysical phenomena. She is also co-president of the Neuroscience Club. As a passionate leader in both clubs, she hopes to engage students and get them involved with sciences in and out of class.

Her favorite classes at LAHS have been her Stem classes. AP Chemistry and AP Calculus BC have been her top two. Her teachers described her as thoughtful, a critical thinker, and super enthusiastic. She fosters and builds communities inside the classroom that everyone around her benefits from.

Aviv learns ancient Greek with her Latin teacher. She loves learning about languages in and out of school, and learning Greek marks her fifth language, and third ancient language to date. She considers herself a very analytical person, and loves her Latin class and how it relates to English words today.

Outside of school, Aviv is working hard to write a book in her spare time and is about 350 pages in. She loves to explore a more creative endeavor that is inspired by her experiences and shows a different side of her. Athletically, Aviv is also an avid rock climber, and climbs regularly at a local gym with friends.

After high school, Aviv hopes to attend a four-year university, and major in physics or astrophysics with a minor in math. She has been passionate about understanding the universe since 8th grade, and loves learning through books and YouTube in her free time. She hopes to become an astrophysicist and work to explore more of the universe, and how it works.

Los Altos High school is excited to see all that Aviv accomplishes in her future, and thanks her for everything that she has given to the school. Congratulations Aviv, and thank you for all you provide to our community.
