

Soveen Agarwal

STUDENT OF THE MONTH
Mountain View High School

May 19, 2025

Mountain View High School is proud to recognize Soveen Agarwal as the Student of the Month for May. Soveen's unwavering dedication to academic excellence, commitment to leadership, and well-rounded involvement in both school and community activities distinguish him as a standout student whose energy and intellect positively impact those around him.

On campus, Soveen is deeply involved in Science Olympiad, where he currently serves as vice president and will take on the role of co-president next year. He describes Science Olympiad as a "sports team for academics," where students compete in high-level science events ranging from Anatomy and Physiology to Optics and Electric Vehicle. Under his leadership, the team has achieved impressive success at national-level tournaments, including consistent top placements at elite competitions like the MIT Invitational. Soveen also serves as president of the Math Club, where he not only participates in prestigious competitions such as the Stanford Math Tournament but also helps lead outreach efforts, including teaching middle school students at Blach.

In addition to his academic pursuits, Soveen is a committed athlete and a key member of the MVHS water polo team. He has played the sport since middle school and was named team MVP during his sophomore year. For Soveen, the camaraderie and competition of water polo have been a meaningful part of his high school experience, offering both challenge and friendship.

Beyond the classroom and the pool, Soveen actively gives back to the community. Through the MVLA Service League of Boys (SLOBs), he volunteers for organizations such as STAND4 and Hope's Corner, contributing his time and energy to serve local causes. He is also advancing through the ranks in scouting, currently working toward the prestigious rank of Eagle Scout — a goal that reflects his perseverance and commitment to leadership.

Among his favorite memories at MVHS are the Science Olympiad trip to MIT and the many team dinners he's shared with both the Science Olympiad and water polo teams. Whether it was building last-minute devices in snowy Cambridge or celebrating victories with friends, these moments have been highlights of his high school journey. Soveen also values the relationships he has built with his teachers, noting how their support and enthusiasm have made even the most challenging classes — like AP Chemistry, AP Physics, and AP U.S. History — deeply rewarding.

Looking ahead, Soveen plans to continue his academic journey by studying STEM at a four-year college. With his passion for science, drive for excellence, and dedication to making a difference, there's no doubt he'll continue to thrive and inspire others in the next chapter of his life.
