

Caroline Chang

STUDENT OF THE MONTH

Mountain View High School

April 2021

Junior

Mountain View High School is honored to present junior, Caroline Chang, as our April Student of the Month. Caroline is involved inside and outside of Mountain View and we are proud of all the work she has put into bettering our school and community.

At school, Caroline is a part of the women's golf team. She enjoys playing golf because of the game's nature of patience and precision. Caroline also likes that it is all about making adjustments and being flexible, and it has also allowed her to learn how to manage all of her schoolwork and extracurricular activities. Caroline is also treasurer of the Fashion Club where she is able to make accessories and other small clothing items through crocheting, knitting, and other design methods. As chess is one of her hobbies, she is also a part of the Chess Club where she enjoys playing with others.

At school, one of Caroline's favorite classes is math because she loves its connection to everyday life. While being surrounded by numbers, data, and algorithms, Caroline appreciates how math helps build problem solving skills in preparation for the real world. Caroline similarly enjoys science because of its complexity that is enjoyable to explore.

Outside of school, Caroline has participated in Technovation, a coding competition where she created an app called Picture It, which is a reminders app that utilizes photos. She also has taken part in a LEGO robotics competition where her team competed against others by navigating LEGO robots through different tasks and obstacles.

Caroline also spends time volunteering at Second Harvest Food Bank or working with the organization BoredofBoredom where she currently tutors two elementary school-age students. In her free time, Caroline enjoys playing the piano. She started playing at the age of 5 and has passed the Certificate of Merit exam for level 10 piano.

Caroline has been described by her teachers as someone who, "is a dedicated, responsible and inquisitive student who constantly strives to go above and beyond what is required of her."

Congratulations Caroline!
